

GOcalf ECONO Calf Milk Replacer

Brand

GO Milk Replacers – Give your animals more GO!

Intended Use

Calf Milk Replacer, **Not for human consumption**

Product Information

GOcalf Econo can be fed to calves from day 4 but is also suited as a two-stage product. As with all animals, colostrum should be fed for the first 4 days before starting them on a CMR such as GOcalf Econo.

GOcalf Econo contains a formulated vitamin and mineral premix to maximize calf health. Bovatec is added as an aid in the prevention of coccidiosis

Suggested Feeding Rates

GOcalf Econo is a milk replacer that can be fed on either the Once a Day or Twice a Day feeding system.

And is an excellent two stage product if initially feeding whole milk, colostrum, or premium Calf Milk Replacer such as Milligans ExcelPlus or Classic and completing the rearing up to weaning with GOcalf Econo.

It can also be fortified with colostrum or whole milk to extend its feeding time. See product packaging for recommended feeding table. Or visit www.milligansfeeds.co.nz
